

## BASIC PLUS - VOICEMAIL

*Want the basics without the frills? If you only need a short greeting and the message left is less than a minute, Basic Plus is the service for you. It provides all of the functions of an answering machine plus much more. Plus it has its own toll free number.*

### How It Works

A voicemail box is programmed to answer incoming calls on your line without the need of equipment. Your incoming callers hear your greeting and are instructed to leave a detailed message. The callers can listen to your information and leave messages. You can be alerted that you have a message by pager, phone, or e-mail.

#### Features

- 20 second greeting.
- 60 second message length.
- 20 message capacity.
- Retain played messages for 3 days, un-played messages for 7 days.
- Changeable greeting.
- Changeable password.
- Can handle up to 4 simultaneous calls.
- Available 24 hours a day, 7 days a week.
- Notification by pager, phone, or e-mail (optional).

#### Benefits

- Your phone is answered when you are talking on the phone, on the Internet or not at home.
- Access messages at home or on the road anytime, anywhere.
- Advanced recording technology offers superb sound quality making messages clear and easy to understand.
- Voicemail is reliable – when the power goes out your voicemail service is still working and taking calls for you. Plus you never have to reset the date and time after a power failure.
- No equipment to purchase, maintains, or clutter your counters – all you need is a phone.
- Selectively replay, save, or delete messages in your mailbox.

### Service Rates
